

RoHS Compliance Statement

Dear Valued Customer,

Further to your request regarding the compliance of Metalex Products Ltd to the guidelines of the RoHS Directive. We are pleased to confirm that all products supplied by us fully comply with the requirements of RoHS Directive 2011/65/EU as amended by EU 2015/863, known as RoHS3.

We will of course continue to uphold these guidelines with any items purchased by Metalex Products Ltd and will keep you fully informed of any changes to our purchasing policy that could affect this trading position.

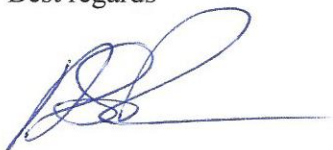

There are some items within our trading stock range that contain higher levels of lead than the guidelines of the directive would advise, however an exception for these products exists within the RoHS directive under "Annex C point 6" and within RoHS3 under "Annex III".

Currently, alternatives to the use of copper alloys containing lead up to 4% by weight cannot be identified as scientifically or technically practicable. Therefore, this exception has been renewed until 21.07.2023 for Category 8 products and 21.07.2024 for Category 9 and 11 products, meaning that copper and brass alloys containing up to 4% lead by weight remain compliant under the current RoHS Directive.

I trust this meets with your approval, if however, you require any further information feel free to contact me at any time.

Assuring you of Metalex Products Ltd's best attention at all times.

Best regards

Adam Rogers
General Manager
